MISSION POSSIBLE

NATURE CHALLENGE

Families will have 11 weeks from the start date of May 22, 2010 to visit as many participating parks and nature areas in North Central Texas as they can! Be sure to complete 1 or more of your missions at Fossil Rim Wildlife Center.

Mission 1: Geocache Scavenger Challenge

There is no charge for this mission. Participants use their own GPS unit to locate given coordinates in succession to find hidden "treasure". This mission is available 7 days a week 9:00 am-4:00 pm. The first stop for families on this mission will be the Somervell County Museum (on Glen Rose's Town Square) GPS Coordinates: N 32°14.041' W 097°45.409'. Once participants find this coordinate, it will provide the coordinates for the next location at Fossil Rim Wildlife Center. The second location will then provide the coordinates to a hidden container, and so on. The final container is a hidden treasure chest that is accessible by the general public visiting Fossil Rim Wildlife Center.

Mission 2: Fossil Dig and Children's Animal Center Scavenger Hunt

This mission costs \$8 per participant and children under age 5 get in free. This mission is available on June 12, June 26th, July 10th, and July 24th only. Reservations are required at least 3 days in advance. Guests arrive at the Overlook, and meet at the EcoCenter on or before the scheduled start time at 10:00 am. This mission takes guests on a 1/2 mile hike to a fossil excavation site to search for fossils, then treks back up to the Children's Animal Center for a scavenger hunt while mingling with a few of our docile animal friends. (If the Children's Animal Center is under renovation, an alternate activity will be substituted.)

Mission 3: Fossil Rim's Wildlife Scavenger Hunt

This mission requires each participant to pay regular admission price to enter the Scenic Wildlife Drive-Thru. Participants arrive at the Admissions Office during hours of operation and request a drive thru scavenger hunt form. This mission involves participants engaging in observation activities from inside their own vehicles along our 9.5 mile scenic tour route. The form may be validated upon completion at the admissions office when exiting the park. Admission price varies with the age of the guest, season, and the day of the week.
